## SMA1060 series Inflatable PFD Type 1 (150 N)

PFD TYPE 1  
AS 1512

Also Available in other colours  
OLIVE GREEN, BLACK, OZ CAMOUFLAGE

**ROARING FORTIES™** SMA1060 is Australian Standards Approved as a 150 Newtons PFD. It is also approved as a coastal lifejacket by Marine Safety Victoria.

With the new marine regulations, it's more important than ever you have the most comfortable PFD 1 around for constant use. SMA1060 is so lightweight (750g) and noncumbersome you'll almost forget it is there.

It is important to note that **ROARING FORTIES™** SMA1060 is modular in that it can be varied & be incorporated with other attachments to form a life saving system.

SMA1060 is inflated pulling the tag downwards. This will then activate the 33g CO2 disposable cylinder & the bladder will inflate. It has also a mouth tube for inflate & deflate activity. This PFD comes with a whistle and SOLAS approved reflective tapes. Light is optional.

**ROARING FORTIES™** SMA1060 valise is available in different colours depending on the type of activity you are engaged in. **ROARING FORTIES™** PFDs do offer you a choice. It also caters for customers who are Left Handed.

The other critical aspect of SMA1060 is that it is service & repair friendly. As Safety Marine Australia is locally based in Melbourne, we can provide you with the technical support. For interstate customers, we do have a network of service agents who can offer you the same assistance if required.

For commercial users, we can incorporate your corporation's logo onto the valise if there is a need.

### SPECIAL FEATURES

- Comfortable and Durable
- Designed to float an unconscious person to a safe position with the head angled at 45° upwards in the water
- Freeboard of > 120mm
- Collar adjustment buckle strap
- Able to withstand 10 psi of pressure
- Can withstand 200,000 flex cycles without physical impairment
- Reliable & Durable
- Light weight
- Has a Grab Handle

### Optional:

- Daniamant Rescue DAN W2 Lifejacket Light
- Detachable Crutch Strap
- Personal Locator Beacon (PLB)
- Spray Hood

### Service Intervals:

- Every 12 Months or After Operation

The Inflatable bladder is manufactured from high quality fabric (radio-frequency-welded yellow polyurethane coated nylon oxford buoyancy fabric) and inflation via a combined CO2 inflation manifold and oral inflation tube. As mentioned above, *the fabric is able to withstand 200,000 flex cycles without any physical damage.*

- Both Manual (inflation on pulling cord) & Automatic (inflation on contact with water) jackets are available.
- Standard location aids in the form of SOLAS retro-reflective and a whistle are fitted in convenient locations on the inflated bladder.

The valise is manufactured from 420 denier-woven-nylon with a hook and a loop closure.

- 38mm waist belt with a side release buckle and 25mm back strap with step lock adjuster.
- Donning the inflatable PFD is simple and easy with donning instructions sewn onto the valise.
- The valise sits higher up against the chest to facilitate more movement and comfort.
